# Warehouse Racking Systems

Interlake Mecalux is one of North America's largest pallet rack manufacturers. We offer a variety of racking and shelving solutions for any storage facility or warehouse. Our warehouse products place a premium on space, safety, efficiency and flexibility.

## Selective Pallet Rack

The most universal system for direct and individual access to each pallet.

## Carton Flow

This hand picking system is made up of slightly inclined wheel and roller platforms. The goods are deposited at one end to slide safely and gradually down to the picking aisle.

## Cantilever

The optimal storage solution for long or bulky items such as furniture, lumber, tubing, textiles, and piping.

## ASRS

Available for boxes or pallets, this automated warehouse system is designed to increase capacity, reliability and performance while allowing direct access to products.

## Radio Shuttle

This high density, semi-automated pallet storage and retrieval system makes it easier to load and unload goods thanks to an electric retrieval cart.

## Mezzanines

Mezzanines can be the most economical way to increase warehouse space without the cost of a conventional building expansion.

## EasyWMS™

EasyWMS is warehouse management software totally customizable for any business.

### Drive-In/Drive-Thru

Ideal for stocking large quantities of relatively few items. It can reduce overall square footage requirements by at least 35% compared to a standard selective rack configuration.

### Push-Back

Goods are placed on a free-rolling carriage that is pushed back into the system by loading additional pallets.

### Metal Point Shelving™

Designed for light to medium hand-stacked applications, Metal Point Shelving can easily be adapted to solve any storage need in a warehouse, office or retail space.

### Spinblock

This automated system consists of compact modules which have been joined together and are suspended from guides running along an oval-shaped track.

### Pallet Flow

In this first-in/first-out (FIFO) system, pallets are loaded at the top end of the slightly inclined rack and glide safely and effortlessly at a controlled pace to the other side.

### Wide Span Shelving

Designed for storage areas where goods are handled manually, Wide Span and Boltless shelving assembles and reconfigures quickly for fast, flexible storage of hand loaded items.

### Movirack™

Cases or cartons are manually picked from deep lanes that provide a steady rush of product in both Carton Flow and Pallet Flow. Ideal for palletized or boxed goods with sensitive expiration dates.

### Clasimat Basic (Vertical Carousel)

Vertical carousels can save up to 70 percent of valuable floor space, minimize dependence on forklifts and ladders, and provide an ergonomic environment for employees.

### SALES OFFICES

CHICAGO  
1600 N. 25th Ave.  
Melrose Park, IL 60160  
708-344-9999

DALLAS  
1520 Selene Drive  
Carrollton, TX 75006
